

PROCENTRIX™

Discover how fast we can make your tools spin!

ProCentriX is an innovative positioning and damping system for insert cutting tools that will give users the ability to run their machinery at their full potential and improve the finish quality.

Our new revolutionary positioning and clamping system allows you to:

- Double your rim speeds
- Immediately improve your surface finish
- Reduce sanding
- Prolong the life of the cutting edge
- Change out the knives in half the time
- Increase your feed rate
- Substantially increase safety
